There is an additional tributary downstream of Confluence 2, that drains the P2 area. Surface water from P2 overflow and the East tank farm flow into this.

At this time I do not have any substantive comments. However, that could change following our planned site visit this week when I get a better feel for the site.

Katrina,

Please find the edits to the DQOs and proposed surface water and sediment sampling strategy. Please let me know if you have any questions.

Thanks,

Teri McMillan
